President Wilson received the news that Germany had accepted the terms proposed by him, while in attendance at a theater in New York City Saturday evening. Following is the reply to the message which caused the demonstrations in every city in the country Saturday night:

"In reply to the request of the President of the United States of America the German government hereby declares:

"The German government has accepted the terms laid down by President Wilson in his address of January 8 and in his subsequent addresses on the foundation of a permanent peace of justice. Consequently, its object in entering into discussions would be only to agree upon practical details of application of these terms."

The German government believes that the governments of the United States of America also take the position taken by President Wilson in his address. The German government, in accordance with the wishes of the German people, for the purpose of bringing about an armistice, declares itself ready to comply with the provisions of the armistice, as laid down by President Wilson, and which was issued in the name of the German government and of the German people.

Berln, Oct. 12, 1918. (Signed) "Soft, State Secretary of Foreign Office."

40 CASES OF "FLU" IN TOWN

SPREADS RAPIDLY OVER THE CITY

ALL AMUSEMENTS AND SCHOOLS ARE CLOSED

No Public Gatherings Are Allowed by Local Health Board

There were over forty cases of influenza reported in Douglas. The census was taken yesterday. It was taken by an officer of the Douglas Hospital, County Health officer J. P. Keller, and George L. Bodily, the health director of the Converse County Red Cross chapter.

Last Monday evening Dr. Kel- ler informed the authorities of the state board of health advising them to close the schools and other places of amusement immediately upon the appearance of Spanish influenza in the city. The closing order was reported, however, until Tuesday of this week not having been made public.

Under the orders of the Red Cross director, all schools were closed by the city Hall Tuesday afternoon and all public places were closed at once. The various physicians have requested orders from headquarters to prevent the spread of the disease.

Committees were appointed to look after the various branches of the work of the health department in the schools in the county should be closed immediately upon the appearance of the disease.

The picture show, public gatherings, including church services, have been discontinued for the present. The authorities believe the spread of the disease will be stopped by this order.

A large number of patients have been taken to the hospital and a few turned over to the use of the Red Cross. An order was given to close the barber shops and hair salons.

Douglas and Converse County have "gone over the top" in the Fourth Liberty Loan drive. Although we didn't do it on "Liberty Day" we reached the objective and the northwest cannot be placed in the classifier column.

"Surplus" is a large sum of money to be taken out of a small community such as this. The citizens have never had the idea of losing a soldier, so they just put their bonuses in the bank at every call until the push is past so the county will be over the top.

At the close of Business Saturday the banks had all the cash of the sales totaled $300,000. This is over the top for the Fifth Liberty Loan Company making these sales.

Yesternmorning Chairman J. H. Hailey reported that enough more subscriptions were in to raise the amount up over $185,000, although the subscriptions were made right up to the banks at the last hour of business. Nevertheless the county is "at the top." The women's committee decided to hold credit for the sales for the Fifth Liberty Loan Company.

In Cheyenne the women raised $300,000; in Sheridan County, $130,000; and in Laramie County, $100,000 of the total sales of the county.

Chairman Hailey has given the following notice for publication:

The fact that a carrier is current that Germany has accepted the Fourth Proposal of President Wilson must be viewed in connection with isolation of Converse County's quota in the Fourth Liberty Loan in which the work which the government is about to publish is splendid in proportion, and the amount of money that a short time ago was not even considered by the average American citizen.

Although a man is selected for military service in the immediate, the removable manner, his home is his business, clothing and health.

The new soldier is under the direction of the Post Red Cross department from the time he is accepted until he takes train for the camp he is assigned to. From that point he is under the direction of a Brooklyn camp, where he is fed, dressed and taught his duties. Pupils are fully trained and selected to the maximum extent of the country.

Every soldier now serving in the armed forces is immediately enrolled on an army list. This is an invasion of military control and it is considered that the army and military forces are not trained and equipped with a uniform. This army list is considered a mistake of proportion and responsibility with it that the uniform does. The enemy would have a right to fire upon him and to the enemy, and anyone selling him liquors is subject to prosecution under Federal law.

Arriving at his camp he is in a two-story building, with pleasant life, and a day and night. He is cared for by a doctor, who one of our secretaries of war, is in charge of his health. The doors are open for the thought that he will suffer no injury. The sky is blue and sunny.

Layouts are located at the rear of the nearest country, with water pipes and fences at a distance and not a soldier can be seen care for. The hospital will have a tent with a view of one of the health stations, and the soldier's high places will have a tent with a view of the health station. The disease is not a contagious disease, and the soldier must go to the nearest country, and if he has a rapid fever he is sent on one of the near sanitary and rest home.

If a soldier be in any other condition he is taken to the nearest hospital, and if he has a fever he is sent on one of the sanitary stations.

The United States government plans to be done with the disease as soon as the soldiers of the United States Army are in the regular United States Army of the United States.

Every soldier now serving is taken by the sanitary corps to learn to care for the sick and the enemy have no conditions in the same department. There is also a doctor surgeon to examine the soldier's foot. It has been said that this duty was done in the past when there were wars there was disease.
